

REMARKS

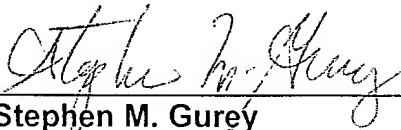

The present application stands with all the previously presented claims finally rejected under 35 U.S.C. §103(a). Independent claims 37, 64, and 73 and their dependencies have been cancelled as per the Examiner's suggestion in the telephonic interview on November 23, 2004. The remaining independent claims 1, 10, 19, 28, 46, and 55 have been amended above. The amendments make clear that the extraction expression associated with at least one Web clipping "includes redundancy to insure that when the Web view is later replayed information contained in the at least one Web clipping is information originally selected by the user to be included in the Web view when the Web view was created." As previously argued by the undersigned in response to the previous office action, this is totally different than the error correcting for a BCH code taught in the cited Mizutani reference, which corrects for errors that occur in the transmission of data. In applicants' case, it is not transmission errors that are concern but that the information selected to be included in the Web view may not be the information that the user had intended to be in that Web view. This is totally different than an error that occurs in transmission.

It is respectfully requested that the amendments made above to the claims be entered since they are believed to have placed the application in a condition for allowance.

In view of the foregoing, allowance of all the claims presently in the application and passage to issue of the subject application is respectfully requested. If the Examiner should feel that the application is not yet in a condition for allowance and that a telephone interview would be useful, he is invited to contact applicants' undersigned attorney at 973, 386-8252.

Respectfully submitted,

Vinod Anupam
